

### Question # 14

Read the following passage and answer the given question.

The belief that most people naturally know how to think is an underlying, correlating assumption that thinking doesn't require much effort or time. While we are fortunate to live in a society that allows us to use time efficiently in everyday living - as when we can pick up dry-cleaning and a meal on our way home, but we seldom take time to think efficiently. Confronted with real-life problems, we imagine they can be dealt with as quickly and easily as a thirty-minute sitcom would portray them to be. We often overlook various aspects of our lives that are desperate for attention until they become a full-blown crisis. Or we dismiss new ideas that could further our growth simply because they do not fit within the general framework of our preconceived notions and self-concepts. An enormous amount of time is spent simply reacting. It's as if we are robots programmed to respond on cue to whatever demands the least time and attention and disregard anything that requires putting in extra time and energy to think. We skim over the surface thoughtlessly but we must acknowledge that thinking well is a time-consuming process. We can't expect instant results. We have to slow down a bit and take time to contemplate, meditate, even pray. It is the only route to a more meaningful and efficient existence.

According to the passage, a worthy life can be lived only when we \_\_\_\_\_.

You can use the given layers in a SAAS cloud model.

- A. Hardware is the equipment (servers, network resources, storage)
- B. Virtualization is the software that makes it possible to create multiple or different environments, based on the hardware. In fact, the software is running on an environment that is not physically present
- C. A platform is a runtime environment in which software can run (.NET, PHP, Apache, etc.)
- D. An application is software for the customer. For any software of cloud model, these layers can be outsourced or in-house

- ☐ Application
  - ☒ Platform
  - ☐ Virtualization
  - ☐ Hardware
  - ☐ None of the given options
- Clear Response

Which of the given layers is developed in house?

### Question # 9

The ministries of the government have thousands of servers across their infrastructures. Now, they want a "Azure" cloud environment to provide a secure, centralized infrastructure for hosting government applications. Which type of used case is it?

Choose the best option

- ☒ Public Cloud
- ☐ Enterprise to accelerated user
- ☐ Private cloud
- ☐ Hybrid Cloud
- ☐ Clear Response

## Question # 8

Consider the given scenario where an enterprise is using the cloud to deliver data and services to the end user. When the end user interacts with the enterprise, the enterprise accesses the cloud to retrieve data and/or manipulate it, sending the results to the end user. The end user can be someone within the enterprise or an external customer. Which of the following options is not a mandatory requirement for this scenario?

Revisit

Choose the best option

- ☐ The cloud service should authenticate the end user.
- ☒ Data manipulation access should be restricted to end user.
- ☐ An enterprise user is likely to have an identity with the enterprise. The idea is that the enterprise user manages a single ID with an infrastructure interacting other identities that might be required by cloud services.
- ☐ Depending on the kind of data the enterprise is managing in the cloud, there may be higher level restrictions on the location of the physical system where the data is stored.
- ☐ It should use existing standards such as RESTful or SOAP application programming interfaces.

Clear Response

### Question # 7

A cloud is a collaboration of networks, hardware, services, storage, and the framework that helps in the representation of computing as services. As a cloud specialist, you need to identify which of the following does not fall under or is not a part of cloud computing.

Revisit

Choose the best option

- ☒ Cloud service providers
  - ☐ Service users
  - ☐ Business management users
  - ☐ End users

Question # 13

Read the following passage and answer the given question.

The belief that most people naturally know how to think is an underlying, correlating assumption that thinking doesn't require much effort or time. While we are fortunate to live in a society that allows us to use time efficiently in everyday living - as when we can pick up dry-cleaning and a meal on our way home, but we seldom take time to think efficiently. Confronted with real-life problems, we imagine they can be dealt with as quickly and easily as a thirty-minute sitcom would portray them to be. We often overlook various aspects of our lives that are desperate for attention until they become a full-blown crisis. Or we dismiss new ideas that could further our growth simply because they do not fit within the general framework of our preconceived notions and self-concepts. An enormous amount of time is spent simply reacting. It's as if we are robots programmed to respond on cue to whatever demands the least time and attention and disregard anything that requires putting in extra time and energy to think. We skim over the surface thoughtlessly but we must acknowledge that thinking well is a time-consuming process. We can't expect instant results. We have to slow down a bit and take time to contemplate, meditate, even pray. It is the only route to a more meaningful and efficient existence.

Which is the most suitable title for this passage?

Choose the best option

- ☐ The Journey of Life
- ☐ A Meaningful Journey
- ☐ Think and Introspect
- ☐ Analyze the Pattern

## Question # 14

Read the following passage and answer the given question.

The belief that most people naturally know how to think is an underlying, controlling assumption that thinking doesn't require much effort or time. While we are fortunate to live in a society that allows us to use time efficiently in everyday living - as when we can pick up dry-cleaning and a meal on our way home, but we seldom take time to think efficiently. Confronted with real-life problems, we imagine they can be dealt with as quickly and easily as a thirty-minute sitcom would portray them to be. We often overlook various aspects of our lives that are desperate for attention until they become a full-blown crisis. Or we dismiss new ideas that could further our growth simply because they do not fit within the general framework of our preconceived notions and self-concepts. An enormous amount of time is spent simply reacting. It's as if we are robots programmed to respond on cue to whatever demands the least time and attention and disregard anything that requires putting in extra time and energy to think. We skim over the surface thoughtlessly but we must acknowledge that thinking well is a time-consuming process. We can't expect instant results. We have to slow down a bit and take time to contemplate, meditate, even pray. It is the only route to a more meaningful and efficient existence.

According to the passage, a worthy life can be lived only when we \_\_\_\_\_

#### Question # 12

The following question consists of a sentence that is either partly or entirely underlined and may or may not have a grammatical error. Below each sentence are four versions of the underlined part of the sentence. Choose the option that correctly rephrases the underlined part of the given sentence. Mark the answer as 'No Error' if there is no error in the underlined part.

A letter from the butler brings with the club the news of Sir Roger's death.

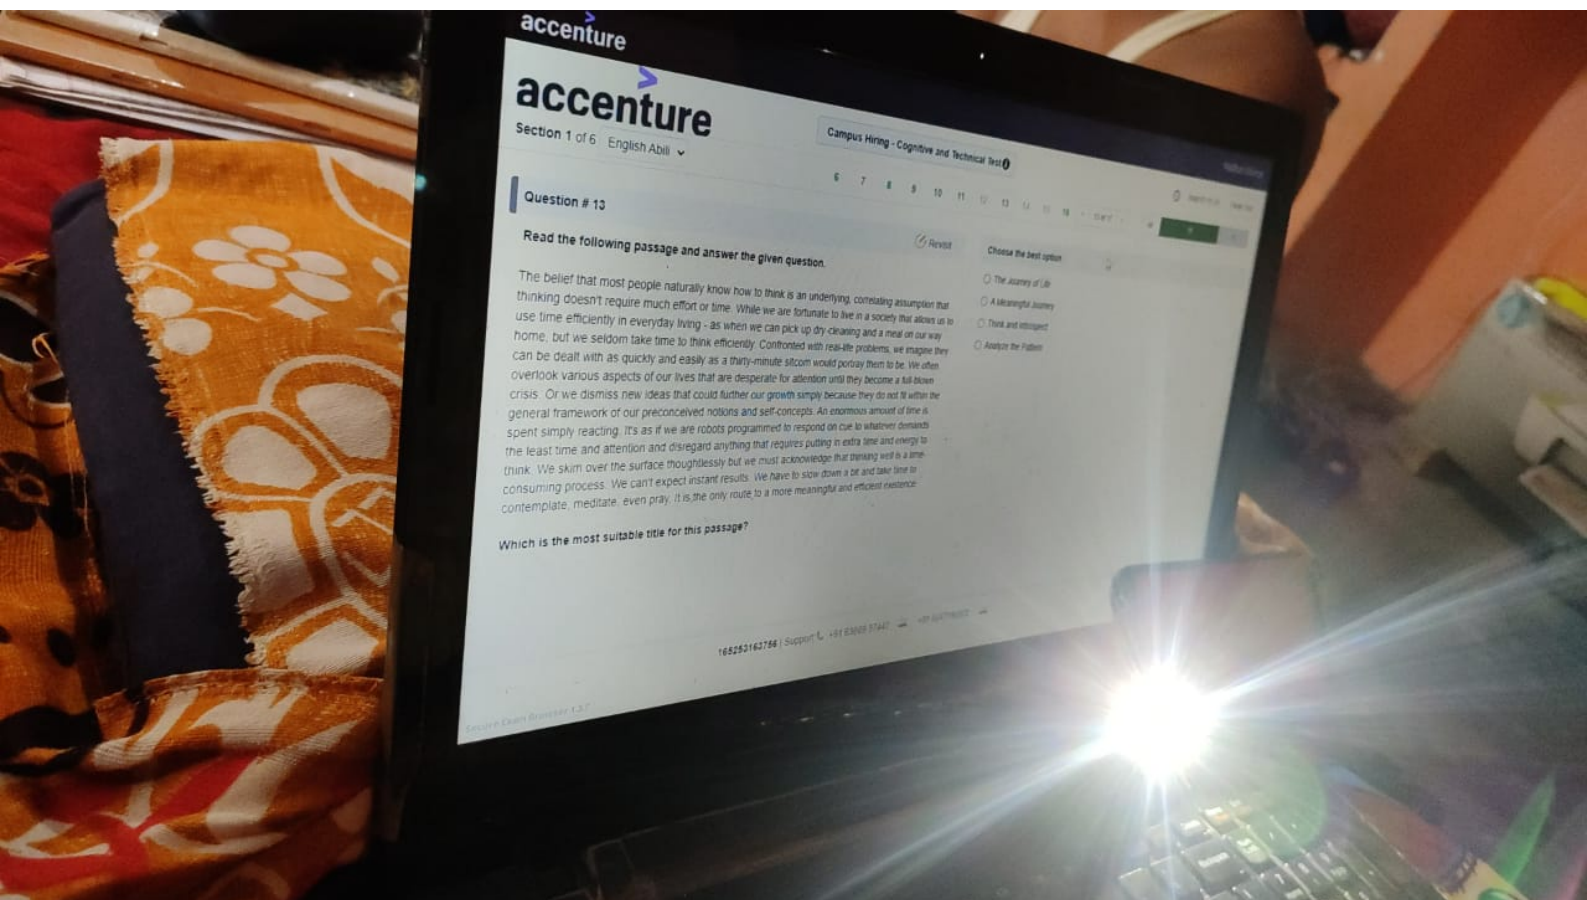

Choose the best option

- ☐ Had bring to the club
- ☐ Bring for the club
- ☐ Bringing to the club
- ☐ Bring to the club
- ☐ No error
